

# **User Manual**

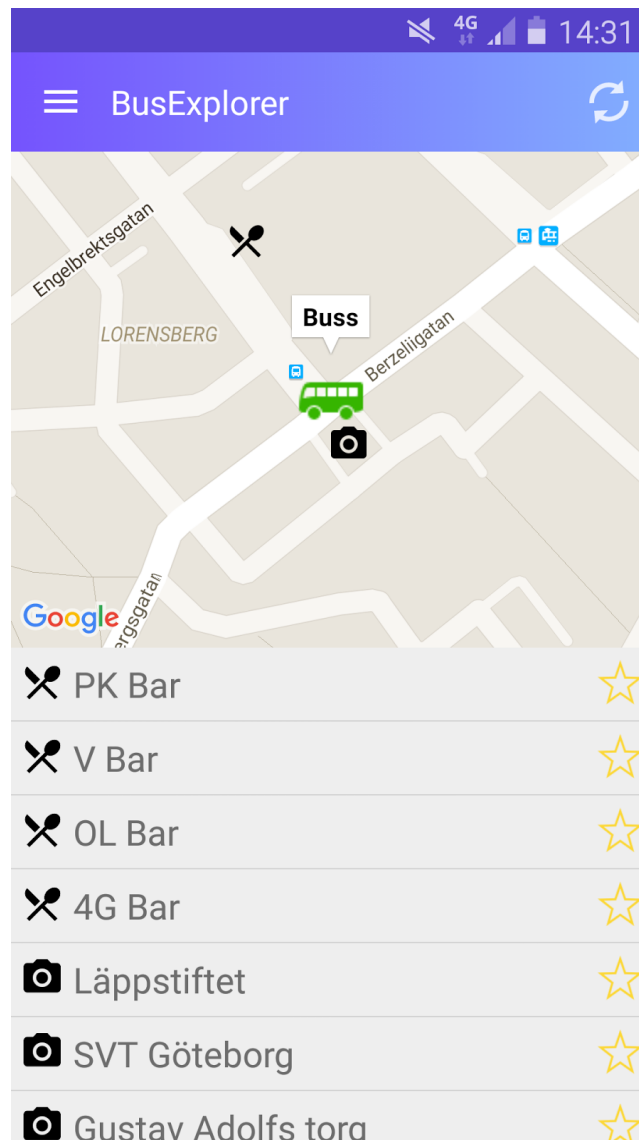

BusExplorer is an android app developed for the electrical buses in Gothenburg, it is meant to make your bus ride more enjoyable by showing you interesting locations around your bus route. By using the app you are able to follow your bus around a map in real time and see bars, restaurants, shops, sightseeing attractions, and more. BusExplorer provides easy to use filtering for the user to select what kind of information is displayed.

BusExplorer works with minimal input from the user. Below is written a manual to show you how to get started using BusExplorer.

When you first open BusExplorer you will be notified about the free Wi-Fi that the buses provide. You will not be able to follow the bus in real time unless you are connected to the bus' free Wi-Fi. Click on "Settings" to be forwarded the the phones Wi-Fi menu and connect from there.

After connecting to the Wi-Fi (or not) you will be taken to the main page of the app. Here you will see a map where the bus is centered.

is the bus you are currently on, it is centered on the map and follows the bus as it drives.

stands for bars or restaurants.

stands for sightseeing.

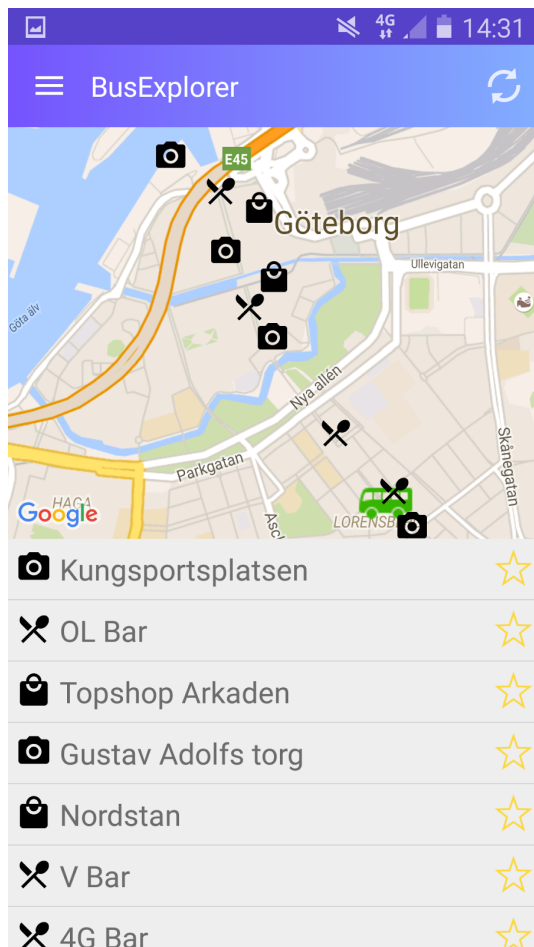

stands for shopping.

You can zoom out on the map to get a view of all locations located around the bus route. In the list below the map you can press the star symbol to mark it as favorite, by doing this the item will always be present in the list.

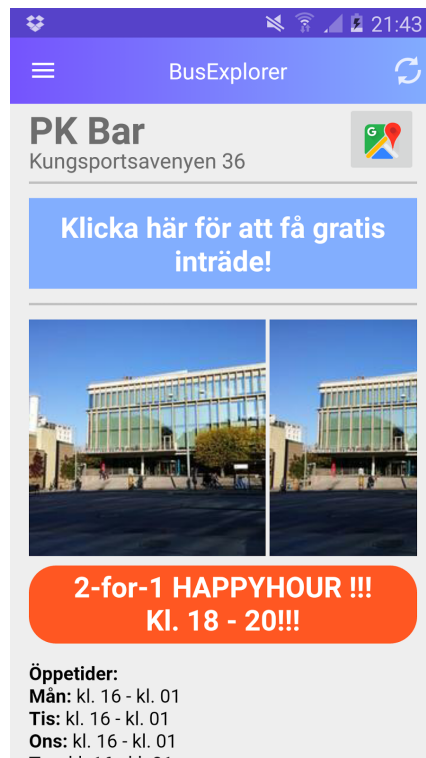

A filled in star means the item is marked as favorite.

By pressing on one of the icons you will get its name. You will also find the name of the location in the list below the map. By pressing on it you will be taken to a page with additional information.

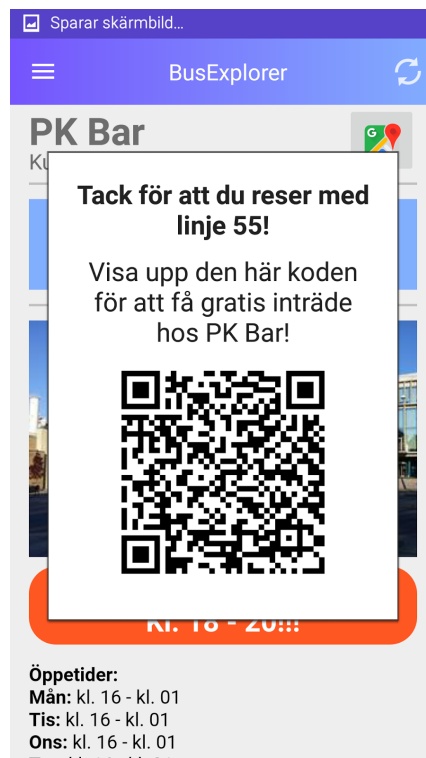

On the page with additional information you will find relevant information about the location such as the address and directions to easily find and visit the location on your own.

If you entered the page of a bar or restaurant you may be given an offer such as free entry or a discount, as a thank you for using the electrical buses!

Below is an example of an offer via a QR code.

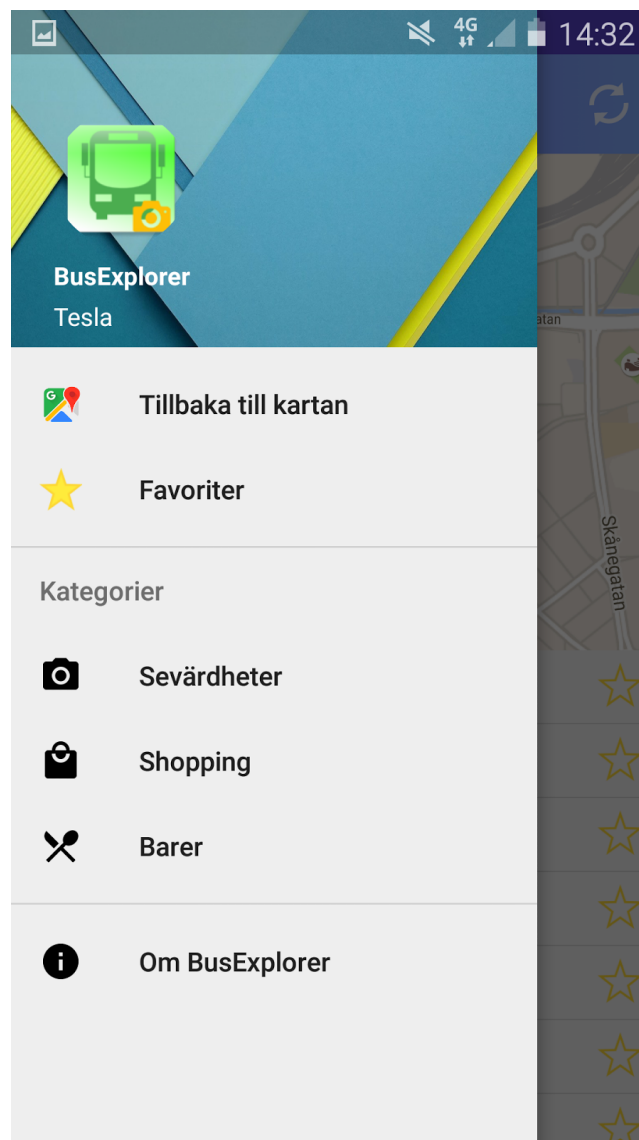

Back on the main page you can access the side menu by simply swiping from the far left side of the screen to the right, or pressing the settings button in the top left corner.

In this menu you can easily filter the different categories to display only the information you are interested in on the map. This is done by simply pressing the icon of the category you dont want to see.

From the side menu you can also access all your favorite points of interest by pressing the “Favoriter” menu item.

You can also read about BusExplorer and those who made it by pressing the “Om BusExplorer” menu item.

A colorless icon means the category has been filtered out and won't be displayed on the map until you press it again.
